SUMMARY

Dynamic Fullstack Developer , with a year of hands-on experience in building scalable applications. Proven track record in delivering high-quality solutions in a startup environment, I am passionate about driving performance and innovation in web development. Ready to tackle new challenges and contribute to impactful projects.

EDUCATION

Master of Science in Mechanical Engineering Sep 2019 - Oct 2020
University of Engineering and Technology
• Specialization in Advanced Manufacturing.
• Thesis on "Innovations in Sustainable Engineering Practices".

Bachelor of Science in Civil Engineering Aug 2015 - Aug 2019
City College of Engineering
• Relevant coursework in Structural Design and Project Management.

SKILLS & EXPERTISE

- **Scripting Languages** : HTML, CSS, React, JavaScript, jQuery.
- **Queuing Technologies** : RabbotMq, Redis, Node Schedules.
- **Backend Technologies** : Node.js, Express.js, Sequelize, PostgreSQL, RESTful APIs, API Management.
- **Tools and Design** : Figma, Postman.
- **AWS Component** : s3

INTERESTS

- **Full-Stack Web Development:** Passionate about creating efficient backend systems and seamless front-end integration for applications across multiple platforms (iOS, Android, and web).
- **User-Centric Development:** Enthusiastic about designing and developing features tailored to diverse user personas, ensuring functionality meets user needs.
- **UI/UX Designing:** Strong interest in crafting intuitive and visually appealing interfaces to enhance user experiences.

WORK EXPERIENCE

Project Engineer, KT TELEMATICS October 2023 to December 2024
Environments: Node.js, Express.js, PostgreSQL, Sequelize, HTML, CSS

Responsibilities:

- Contributed to the company's CRM application by implementing minor enhancements based on user requirements.
- Collaborated with the team to ensure smooth functionality and address user feedback effectively.
- Gained hands-on experience in backend and database management.

Project Engineer, Asset Tracker

Role: Full Stack Developer

Environments: Node.js, Express.js, PostgreSQL, HTML, CSS, Redis, RabbitMq, React

January 2024 to
April 2024

Responsibilities:

- Environments: Node.js, Express.js, PostgreSQL, Sequelize, REST APIs, GPS Tracking Devices Integration
- Responsibilities:
- Developed and maintained the Asset Tracker application, delivering web and mobile solutions for vehicle tracking using devices.
- Provided tailored web solutions to large clients with extensive vehicle fleets, ensuring direct coordination with customers to address their specific requirements and challenges.
- Integrated multiple tracking devices into the application to monitor vehicle health and performance, ensuring real-time data access for clients.
- Collaborated with cross-functional teams to gather customer feedback and implement new features and improvements based on customer needs.
- Worked closely with the Android and iOS teams to ensure seamless integration of backend APIs with the mobile application, optimizing data flow and user experience.
- Developed reporting and analytics features to give clients insights into fleet performance, enabling data-driven decisions.
- Ensured high availability, scalability, and reliability of the application to handle large-scale customer deployments.
- Troubleshoot and resolved issues related to software, ensuring smooth operations for clients.

Project Engineer, Avolve

Role: Backend Developer

Environments: Node.js, Express.js, PostgreSQL, Redis, RabbitMq, API Integration

May 2024 to
Current

Responsibilities:

- Environments: Node.js, Express.js, PostgreSQL, Sequelize, API Integration, SFDC, MDG
- Responsibilities:
- Spearheading backend development for Avolve, a tyre service application for heavy trailer vehicles, used by service teams, sales teams, and customers.
- Developed backend solutions for both iOS and Android platforms, with user roles configured to cater to different personas and their specific needs (service, sales, and customer tracking).
- Led the design and implementation of large module releases on a monthly basis, ensuring timely delivery and functionality.
- Collaborated with cross-functional teams to gather requirements, design solutions, and implement new features for enhanced service management and tyre tracking.
- Integrated Avolve with third-party systems for data sharing, including working with Deloitte's SFDC platform and MDG for seamless data exchange.
- Ensured scalability, reliability, and performance of backend systems to support large volumes of data and high-frequency requests from mobile applications.
- Troubleshoot and resolved complex issues related to both backend and third-party integrations, ensuring minimal downtime and efficient operations

ADDITIONAL INFORMATION

- **Technical Skills:** Project Management, Structural Analysis, Best Co ordination.
- **Languages:** English, Tamil
